Arslan Görkem Şimşek

Backend Developer

Phone: 05413468177

Address: İzmir / Turkey

Military Service: Exempt

Email: arslangorkemsimsek@gmail.com

I started to develop projects in different scales since i graduated from high school. Since then i keep studying and working in same time for having experience and information both. I believe that all projects teach us something new.

EXPERIENCE

HotelRunner
April 2024 - Still

Backend Engineer

Working in core project of company which is most complex one. Coding new features using ruby on rails with docker enviroment. Also one of the API integration responsibles

Techs : Ruby (Ruby on Rails), Mysql, RabbitMQ, jQuery, Docker

PayTR
March 2022 - April 2024

PHP Software Developer

Part of big development ecosystem. We developed and maintain internal CRM software as a team. Worked here on a existing live panel with CI technique.

Techs : PHP (Laravel), Mysql, Redis

- That project includes;
  - Complex SQL queries (providing indexes required)
  - Elasticsearch (Custom Search Engine)
  - Resource API endpoints
- Experienced how big firms deal with SDLC

Yonca Food A.Ş.
June 2019 - March 2022

Information Technology Staff

We were responsible with 3 factories and 1 head office for their technical problems, any needs or technical improvements as IT department.

Used techs: Microsoft AD Structure, (For web works =>) PHP, Mysql, Bootstrap

- Registering new users to ActiveDirectory
- All required setup needs
- User problems with (AD errors, network errors, hardware or software errors etc.)
- I was especially responsible for company's official websites improvements and B2B solution for their customer. (Also PHP and Mysql used.)

Frontal Creative Agency
June 2016 - May 2018

PHP Software Developer

This agency was keeping getting projects along with my work time there. Some of them was long-term and kept growing and others were little official websites etc.

-Used techs : PHP (Laravel), AWS S3, Mysql, HTML&CSS, Bootstrap (Sometimes Scss), Javascript (Pure or Jquery Lib.)

- Developing control panels with PHP for those kind of projects
  - Making little changes on web pages
  - B2B, B2C, CRM
  - eCommerce,
  - Portfolio & Official
  - Designing databases valid for normalization with mysql
  - Building VPS server from scratch in local network and www

Efficient Ligth

April 2016 - May 2016
